The most popular marker classes of dry bean growers in North Dakota and Minnesota in 2020 were found to be typical varieties, as reported in the 2020 Dry Bean Grower Survey of Production, Pest Management, and Economic Evaluation conducted by NDSU Extension service. The survey was conducted in cooperation with the North Dakota Agricultural Coop Association and the Minnesota Agricultural Education Foundation.

The survey found that among the 144 respondents, the most popular classes of dry bean growers were the most common methods of marketing their beans. The survey also found that most growers (70.8%) used dry bean ground roll for ground roll marketing. About 52.2% of growers who used dry bean ground roll found the ground roll to be the most beneficial. The survey also found that most growers (70.8%) used dry bean ground roll as the most beneficial for ground roll marketing. About 52.2% of growers who used dry bean ground roll found the ground roll to be the most beneficial.

The survey also found that most growers (70.8%) used dry bean ground roll as the most beneficial for ground roll marketing. About 52.2% of growers who used dry bean ground roll found the ground roll to be the most beneficial.
