George Bird Grinnell, Conservationist

April 15 -- George Bird Grinnell, the "Father of the National Parks," was born in New York City on this date in 1849.

Grinnell was a great conservationist for American culture earned him notoriety. He would devastate his Sioux and other American families. But the defining points of George Bird Grinnell's life began when he was seven years old. He moved with his family from Brooklyn to Manhattan, where the Indian reservation was a wealthy estate owned by John Jacob Astor. George Bird Grinnell was allowed to play in a hawthorn and vine-covered wilderness collection. George was greatly impressed by Audubon's collections. Austin Audubon had gathered thousands of bird skins and was a man of many environmental concerns.

As a child, Grinnell was a fossil collector, but he was not as interested in fossils as he was in birds. He was interested in the science education and frontier techniques used by frontiersmen. As a child, Grinnell was a fossil collector, but he was not as interested in fossils as he was in birds. He was interested in the science education and frontier techniques used by frontiersmen.

George Bird Grinnell, Conservationist
